

Aligning the Australian Social Value Bank to Victoria Public Health Outcomes Framework

This document maps Victoria Public Health Outcomes Framework to the social values available in the Australian Social Value Bank (ASVB). These are suggested outcomes where we see a correlation in what the outcome is looking to achieve and the values in the ASVB. Organisations may choose to use all or a subset of the recommended outcomes. Certain values are applicable to multiple outcomes in the Victorian model and may also be applicable in domains we have not identified in this analysis, based on the work individual organisations are focused on.

Victoria Public Health Outcomes Framework

Table 1: Summary of the outcomes framework

Domain 1: Victorians are healthy and well	Domain 2: Victorians are safe and secure	Domain 3: Victorians have the capabilities to participate
Outcome Victorians have good physical health	Outcome Victorians live free from abuse and violence	Outcome Victorians participate in learning and education
Indicators Increase healthy start in life Reduce premature death Reduce preventable chronic diseases Increase self-rated health Decrease unintentional injury Increase oral health Increase sexual and reproductive health	Indicators Reduce prevalence and impact of abuse and neglect of children Reduce prevalence and impact of family violence Increase community safety	Indicators Decrease developmental vulnerability Increase educational attainment
Outcome Victorians have good mental health	Outcome Victorians have suitable and stable housing	Outcome Victorians participate in and contribute to the economy
Indicators Increase mental wellbeing Decrease suicide	Indicator Decrease homelessness	Indicator Increase labour market participation
Outcome Victorians act to protect and promote health	Domain 4: Victorians are connected to culture and community	Domain 5: Victoria is liveable
Indicators Increase healthy eating and active living Reduce overweight and obesity Reduce smoking Reduce harmful alcohol and drug use Increase immunisation	Outcome Victorians are socially engaged and live in inclusive communities	Outcome Victorians belong to resilient and liveable communities
	Indicators Increase connection to culture and communities Increase access to social support	Indicators Increase neighbourhood liveability Increase adaptation to the impacts of climate change
	Outcome Victorians can safely identify and connect with their culture and identity	Outcome Victorians have access to sustainable built and natural environments
	Indicator Increase tolerance of diversity	Indicator Increase environmental sustainability and quality

How to apply the ASVB to Victoria Public Health Outcomes Framework

The ASVB values closely align to Victoria Public health Outcomes Framework. There is a differentiation in the domains we have used to segment our outcomes list, however the underlying outcome indicators in the majority exist within the ASVB.

To see a full list of our current social values, [download here](#).

We recommend organisations workshop the outcomes they are focused on in their programs and map these to outcomes within the ASVB. We are always available to facilitate these exercises as part of a subscription to the ASVB or as a separate piece of scoping work.

The next step is to begin embedding the required evidence stipulated in our User Guide and Value Calculator. This is the data which will be required to ascertain if individuals have achieved the outcome.

This evidence along with details about your program and its associated costs can then be used within the ASVB Value Calculator to create your Impact Valuation Statements.

Please [get in contact](#) to subscribe or discuss your social impact measurement approach.
